

EXISTING ZONING CODE

If your property is projected to be...

Then it may be currently zoned...

T2.1

Rural Reserve: T2 is primarily a rural zone, focused on agriculture, silviculture, and related processing and logistics located outside the Urban Service Area. Large Scale.

T2.2

Rural Reserve: T2 is primarily a rural zone, focused on agriculture, silviculture, and related processing and logistics located outside the Urban Service Area. Medium Scale.

A-1/A-2

The agricultural districts are those areas, the present or prospective use of which is primarily agricultural, or the future development of which is uncertain, and for which a more restricted zoning would be premature. The A-1 district is composed largely of land used for citrus production, nurseries, greenhouses, and vegetable farms, whereas, the A-2 district is composed largely of land used for livestock and poultry production.

A-R

The purpose of the A-R agricultural-residential district is to provide for residential subdivision in a rural or farm atmosphere. The growing of supplemental food supplies for families is encouraged. It permits a reasonable use of the property while protecting rural/agricultural areas from urban encroachment, preventing rapid expansion of public services and facilities such as schools, roads, water and sewer lines.

EXISTING ZONING CODE

If your property is currently zoned...

Then it may be projected to be...

R-CE

The purpose of the R-CE district is to establish areas where very low residential densities may be maintained and where investment in homes will be protected from the adverse effects sometimes found in agricultural districts. This district is primarily residential. However, certain uses found only in agricultural districts may be permitted.

T2.1

T2.1 is a rural zone made up of very large parcels with single-family residential homes and permits a variety of agriculture, silviculture, and related uses. The T2.1 zone is located in the County's Rural Service Area (RSA).

T3.1

T3.1 is considered a low intensity residential zone consisting of large single-family lots, but also permits limited types of agricultural uses. The T3.1 zone is primarily located near or adjacent to the County's Rural Service Area (RSA) but within the Urban Service Area (USA). The T3.1 zone is also found in certain Rural Settlements that were established prior to 1991.

EXISTING ZONING CODE

If your property is projected to be...

Then it may be currently zoned...

T3.2

A low intensity residential zone including medium and large houses with some accessory dwelling units. T3.2 is intended for limited use at the edge of Place Types within the Urban Service Area and broadly within Rural Place Types.

T3.3

A low intensity residential zone including a mix of small, medium, large houses, and accessory dwelling units. T3.3 is intended for broad use within the Urban Service Area, and within Rural Place Types.

R-1

The areas included in an R-1 single-family dwelling district are of the same general character as R-1-AA and R-1-A, but with smaller minimum lots and yards, and a corresponding increase in population density.

R-1A/R-1AA

The areas included within R-1-AA and R-1-A single-family dwelling districts are intended to be single-family residential areas with large lots and low population densities. Certain structures and uses required to serve educational, religious, utilities and noncommercial recreational needs of such areas are permitted within the districts as special exceptions.

EXISTING ZONING CODE

If your property is projected to be...

Then it may be currently zoned...

T5.1

T5.2

A very low intensity urban zone permitting commercial, mixed-use, and residential buildings in a rural context. T5.1 is generally intended for use in the Rural Service Area within the centers of Rural Place Types.

A low intensity urban zone permitting commercial, mixed-use, and moderate intensity residential buildings that occupy the majority of their sites. T5.2 is generally intended for use in main streets, neighborhood centers, and at the edge of urban centers and TODs transitioning to T4.

C-1

C-2

The C-1 retail commercial district is primarily for the furnishing of selected commodities and services at retail. It is encouraged:

- (1) At intersections of collectors and/or arterials;
- (2) Where it will not direct commercial traffic through residential districts;
- (3) Where adequate public facilities and services are available, as defined in the comprehensive plan;
- (4) Where compatible with adjacent areas or where buffers can be provided to ensure compatibility; and
- (5) To a limited extent in rural settlements throughout the county to meet the needs of an identified community, or in growth centers as defined in the comprehensive plan.

The C-2 general commercial district is used to provide for the retailing of commodities and the furnishing of several major services, selected trade shops and automotive repairs. This district is encouraged at locations along minor arterial and major arterial roads where general commercial uses are compatible with the surrounding neighborhood. Typically, it occupies an area larger than C-1, serves a larger population, and offers a wider range of services. It is promoted within the urban service area or in rural settlements where uses of this intensity are already established. This district should not be adjacent to single-family residential zoning districts.
