

If ... Lithium-ion batteries catch fire, stay away from it and call 911 immediately.

To Prevent, you can unplug devices that have lithium-ion batteries. And also remember to have an escape plan too.

A firefighter is a good example for someone to ask for help.

Don't put lithium-ion devices near or around fuel or wood.

where is the fire?

He would stand in the fire with no fear.

family can be rescued for Piratations.
